ABOUT: ATLANTIC LABOR SOLUTIONS

Our goal is to connect companies with our top industrial/shipyard talent. The Atlantic Labor Solution's team members work within all US states and consist of welders, pipe-fitters, electricians, and so much more.

OUR HISTORY: We along with our affiliate companies, Advanced Technology Inc. (A.T.I.); Advance Company Group, Advance Marine Construction Inc., and Advance Fabrication & Construction LLC, have over 40 years of customer satisfaction in the Marine, Power Generation, Oilfield, Manufacturing Natural Disasters and Mining Industries. With our ability to mobilize crews and solutions to any manufacturing problem you may have, we consider ourselves advanced for the future. Labor Solutions, Custom Fabrications, Process Manufacturing and Customer Satisfaction is the basis for our success and we would like to continue that by offering the customer our utmost integrity and job satisfaction.

POTENTIAL CLIENTS: If you are a potential client looking for a cost-effective way to provide supplemental and/or permanent support for your personnel labor needs, custom fabrications, process equipment, and all of your needs related to the Marine, Oilfield, Mining Equipment Repair and Maintenance, Power Generation, or ASME coded vessels, look no further. Atlantic Labor

Solutions offers service beyond comparison with its ability to manage several companies which specialize in fulfilling your needs at a moment's notice. Atlantic Labor Solutions was created with the customer in mind to supply you with the proper solution for your complex needs.

SAFETY AND COORDINATION: We have full-time Safety Coordinators on staff which monitor all accidents, safety procedures and are local to train all personnel. These training sessions include, MSHA and OSHA standards for shipbuilding and repair industry, industrial applications and company standards. Our standard OSHA safety training is provided to our employees in the following areas: Confined Space for Industrial and Marine Industries, OSHA 12-hour course for Marine and Industrial Trades, Lock Out and Tag Out, Fire Watch, Respiratory Protection and Drug Testing and Awareness. We train all personnel for the Mining Industry with our 24-hour Basic for Surface Mining course. Our staffing coordinators are highly-skilled individuals who have a background in whatever trades he or she is managing.

We have a pool of experienced skilled craftsmen that have been drug screened, skill-tested and safety trained to meet all

LOOKING FOR SKILLED LABORS FOR YOUR NEXT PROJECT?

Here are some of the skilled trades we provide:

- Inside/Outside Machinist
- Structural Welders
- Pipe Welders
- Combination Welders
- Sand Blasters
- Ship Fitters
- Pipe Fitters
- Electricians
- Electronic Technicians
- Carpenters
- Sheet Metal Mechanics
- Brick Masons
- Riggers
- Laborers
- Roustabouts
- Brush & Roll Painters
- Reclamation
- Boiler Makers
- Aluminum Welders
- Heavy Equip. Operators
- Heavy Equip. Installers
- Site Preparation
- Heavy Equip. Re-locater's
- Mining Equip. Repair
- Mining Welders
- Fire Watchers

**Advanced Marine
Construction Inc.**

Incorporated in October 2006

This limited liability company was created to transact business for a profit by obtaining contracts in the fabricating and construction industries.

ABOUT: ADVANCED TECHNOLOGY INC.

HISTORY

Advanced Technology Inc. (ATI) possesses over 40 years of combined job placement, and customer satisfaction in the Industrial and Marine Industries. If you don't believe us, ask some of our customers. With one of the largest pools of skilled craftsmen, we can supply your labor needs at a moment's notice. Finding the right skilled workers for an employer's job or finding a position for a skilled craftsman is our specialty and we have the history to prove it.

Our company started in Newport News, Virginia in 2003 with the need in mind to supply reliable and skilled contractors to the shipbuilding industry. After we accomplished this feat we moved on to the mining, oilfield and power-generating industries.

In the past few years, we have diversified our industries and expanded throughout the United States and Canada. We have incorporated one of the largest pools of skilled craftsmen available to these industries and developed our own welding school in Moss Point, Mississippi in partnership with Masters Welding Service to bring more qualified welders into the industry with our "Fast Track Welding Program".

Our future looks bright as we pledge to bring manufacturing jobs back to the United States. But not just any jobs!!! Well-paying, highly-technical and long-term work for the top 10 percent of skilled workers in the United States. Not only do we plan to provide work for the top 10 percent of the skilled workers in the United States; we plan to keep them busy for the rest of their lives.

DEPENDABLE

After allowing Advanced Technology Inc. to supply skilled craftsmen, you can then rely on ATI's dependable and innovative ways to solve all issues 24 hours, 7 days a week. We will help your company build and market its services to customers with our reputation and credibility of being on time, safety trained with skill levels to the highest standards, while coming within your budget in a drug-free environment. With one of the largest pools of skilled craftsmen in the United States, we pride ourselves on quality workmanship, not just the number of employees, but the best employees for your job.

ABOUT: ADVANCED FABRICATION AND CONSTRUCTION

Advanced Fabrication & Construction Inc., (AFC) was incorporated on October 2006; and has incorporated the ability to perform Custom Fabrications, Process Manufacturing Equipment, Oil Storage Facilities, Sheet Metal Installations, Heavy Equipment Repair and Construction.

We received our ASME and National Board Certification in February of 2014 to build and repair pressure vessels and boilers. Our presence in the Mining and Oilfield Industries has allowed us to become a solid manufacturing, repair and maintenance leader in these industries. Our ability to mobilize crews in mines, oilfield construction and all of our customer projects has led to customers depending on us to solve various problems dealing with custom fabrication and maintenance that our customers depends on us to accomplish. Whether it's the sweltering heat of Texas or the -20 degree weather in Alberta Canada, we are equipped to go where we are needed and complete the task.

Our customers know that all they need to do is call us, explain the situation and we will solve their problems. With our experienced personnel in these fields, we can quickly and efficiently mobilize a crew or come up with a product to be manufactured to the highest standards that are expected.

We have committed ourselves to the Oilfield Process Manufacturing, Mining Industries, Power Generation and all industries that require sophisticated technology that AFC specializes in. We strive to make our companies household names in the future. Give us a call and we will do the rest.

Advanced Fabrication and Construction is an EOE Employer

THE A.L.S. FAST TRACK WELDING PROGRAM

ALS incorporates the ability of an unskilled laborer to develop a good solid work history and trained as a skilled laborer in one of our programs such as the Fast Track Welding Program. This program takes students which has demonstrated effective work ethics and trained them at a fast pace to work in Advanced Technology Inc. contract labor business. These candidates are placed on a job after the completion of the 8-week fast-paced program. When successful, these candidates either become a full-time welder or work with an experienced welder until their skill level is to the standard of ATI employees. We are committed to providing your company with staff that are professional, friendly, helpful, and possess excellent customer service skills.

ALS along with Master Welding Services has developed an 8-week Fast Track Welding Program in Moss Point, Mississippi. This program is outlined as follows:

Week 1

Registration, Orientation, General Shop Safety, Arc Welding Safety, Oxy-Acetylene Cutting Safety, Welding and Cutting Processes and Electrodes. This covers 40 hours 4 days 10 hours per day.

Week 2
